

Effective March 1, 2017 a surcharge of 1.0 % will apply to all shipments originating or delivered to Newfoundland points

The 2016 changes to the Newfoundland budget included tax increases that had a significant impact on the transportation services we provide to and from the province.

These changes took place in August of 2016 and increased provincial taxes on diesel fuel, gasoline and trucking insurance. We can no longer absorb these cost. These increased costs were outside our control and must now be passed on as a cost of serving the province. This surcharge is in effect immediately and will allow us to continue to serve your transportation needs to and from Newfoundland.
