

FASTFRATE GROUP

TO: All our valued customers
FROM: Jay Lee, Vice President, Business Analytics & Engineering
DATE: April 1st, 2025
SUBJECT: **Important Update on Carbon Surcharge and Net Environmental Surcharges**

To all our valued customers:

Following our previous communications, we are writing to confirm important updates regarding the carbon surcharge and the introduction of new environmental surcharges in line with provincial legislation.

Carbon Surcharge Update

- The **current carbon surcharge will remain in effect until April 6, 2025**, to cover carbon-related costs already incurred through utility and fuel purchases.
- **As of April 7, 2025, the carbon surcharge will be fully eliminated.**

New Environmental Surcharges (Effective April 7, 2025)

In accordance with provincial environmental regulations in British Columbia and Québec, we will be implementing a **flat fee environmental surcharge** for shipments moving into or out of these provinces:

- **BC Environmental Surcharge:** \$6.62 per shipment (inbound or outbound)
- **QC Environmental Surcharge:** \$1.28 per shipment (inbound or outbound)

These charges are based on the following provincial legislation:

British Columbia

- BC Carbon Tax Act (S.B.C. 2008, c.40); BC Low Carbon Fuels Act (S.B.C. 2022, c.21)

Québec

- Environment Quality Act (C.Q.L.R. c.Q-2)

These surcharges ensure alignment with ongoing provincial environmental mandates while allowing us to maintain the high level of service you expect.

Sincere Regards,

Jay Lee
Vice President, Business Analytics & Engineering
